

Turimiquire Foundation

When we dream alone, it is only a dream.
When we dream with others, it is the beginning of reality.
Dom Camera Helder

Turimiquire Foundation *Our Mission and History*

Turimiquire Foundation is a U.S.-based non-profit organization that has served the low-income population of Sucre state in northeastern Venezuela since 1996. **Fundación ServYr** is our “sister” non-profit foundation established in Venezuela at the same time for executing our in-country programs. Funds raised in the U.S. and other countries by the Turimiquire Foundation are administered through *Fundación ServYr* to run our Venezuelan programs. *Fundación ServYr* also raises program funds separately within Venezuela. Both organizations share the following **objectives**:

Reproductive Health and Family Planning: To support and improve education in sexual and reproductive health, and to deliver services in family planning.

Rural Education: To implement literacy and educational programs with the goal of helping the rural population take a more active role in the improvement of their lives.

Sustainable Rural Development: To support and promote the development of eco-agricultural practices that conserve and improve the environment; to support and promote alternative energy technologies, rural hygiene, and ecological restoration.

Cultural Preservation: To preserve the culture and traditions of the *campesino* (rural) population.

Reproductive Health and Family Planning

Turimiquire Foundation and *Fundación ServYr* work in collaboration with the Ministry of Health of the State of Sucre, and with the State Office of Gender and Women’s Affairs, along with the private sector, and with PROSALUD InterAmericana and PLAFAM / IPPF-WHR in Caracas. In selected public health establishments, we distribute free contraceptives and offer free family planning consultations directed by a gynecologist-obstetrician. Within the private

sector, we offer family planning and reproductive health consultations for low-income patients. We have offered surgical sterilizations since 1997, and beginning in 2005, we have been using the less invasive laparoscopic technology that allows patients to recover and return to their daily activities more rapidly. We offer workshops on sexual and reproductive health and family planning in schools and other public venues. This table summarizes our activities from May, 1997 through December, 2008:

Total number of women attended	20,650
Total number of family planning visits	69,048
Oral Contraceptives distributed	55,601 (monthly cycles)
Intrauterine Devices placed	4,918 (IUDs)
Tubal Sterilizations	2,686
Sexual and Reproductive Health workshops	1,462
Student and adult participants in our workshops	32,329

Chronology of Selected Projects in Reproductive Health and Family Planning:

- 1997:** Initiation of family planning services in Cumanacoa and rural Montes County.
- 1999:** Initiation of family planning services in Cumaná and rural Sucre County.
- 2000:** Initiation of a family planning clinic in the Fe y Alegría Urban Public Health Clinic, Cumaná.
- 2002:** Establishment of the **Adolescent Orientation Center** in the Fe y Alegría Urban Public Health Clinic, Cumaná, in collaboration with FUNDASALUD and the State Office of Gender and Women’s Affairs, offering education and information on sexual and reproductive health to adolescents both within and outside of the school system.
- 2003:** Initiation of Educational Workshops on sexual and reproductive health, family planning, sexually transmitted infections and diseases, gender-based perspectives, etc., in schools and public health facilities in several counties.
- 2003:** Initiation of family planning services in the “Dr. Julio Rodriguez” Urban Public Hospital, Cumaná.
- 2005:** Adolescents who have attended our sexual responsibility workshops write and present a play entitled *“Nothing’s Going to Happen to Me... (But It Did!)”* organized by the youth theater group of the nearby Culture Foundation of San Juan de Macarapana.
- 2006:** Initiation of **“Pana a Pana”** (buddy to buddy) project with the preparation of 90 adolescents in Cumaná to serve as educators and facilitators in sexual and reproductive health among their peers.
- 2007-08:** Project initially financed by the state government in 2007 and executed by **Fundación ServYr** for the reduction of pregnancy and sexually transmitted infections in the adolescent populations of Sucre, Montes, Ribero, Mejía, and Bolivar Counties.
- 2009:** Intensified reproductive health outreach at public health facilities along the rural Via Cumaná-Cumanacoa.

General Health

We collaborate with the state Children's Foundation (*Fundación del Niño Sucre*), the Ministry of Health (*FUNDASALUD*), the Lions Club (*Club de Leones*), and the State University (*Universidad del Oriente*) in rural medical and dental outreach programs, offering attention in the areas of pediatrics, vaccinations, family planning, tuberculosis, *chagas* disease testing, evaluation and treatment of respiratory inadequacy, and dentistry.

Rural Education

We support various educational activities in the rural areas of Barrancas-Tigre, Río Brito, and nearby communities along the Cumaná-Cumanacoa road. We help fund and maintain the following educational programs:

- Two outlets of subsidized school supplies
- Barrancas kindergarten, which we founded in 2001
- Community library and computer center
- Remote Río Brito elementary school (support for teacher education and school activities)
- Scholarship Program for the Río Brito community that enables up to 40 rural students to continue their studies at local secondary schools – five of these students graduated from high school in 2008, and two are now continuing to university, which is a significant step forward for this community.

Chronology of Selected Projects in Rural Education:

- 2001:** Establishment, with the financial support of the Embassy of the Federal Republic of Germany, of the first **Kindergarten** and **Barrancas Community Library** in Tigre-Barrancas for students along the Cumaná-Cumanacoa road.
- 2003:** Renovation, with the financial support of the Embassy of the Netherlands, of the **Madre María Child Care Center** for the Agua Santa Community, and of the Barrancas Community Library.
- 2003:** Initiation of our **Scholarship Program** for remote rural students who wish to continue their studies in high school. There are now over 40 students participating yearly, and several students continuing to university with our support.
- 2004:** Installation of an Internet and **Computer Center** in **Casa ServYr**, Fundación ServYr's headquarters in Cumaná, with free access for low-income members of the rural and urban communities for their studies and general use.
- 2004:** State University (*Universidad de Oriente*) makes a major donation of books and materials for the rural Barrancas Community Library.
- 2005:** Construction of the **School Cafeteria** for the remote Río Brito elementary school.
- 2006:** Creation of the **Brito-Barrancas Community Center** bringing together a broad selection of our programs for children, adolescents, and adults, including a staffed library, tutoring, and computer lessons; art, dance, and cultural activities; dental attention (with the support of the Sucre State Children's Foundation); and medical attention (with the support of the Sucre State Health department).
- 2007-2009:** Fundación ServYr and the Brito-Barrancas Community Center receive financing from the Sucre State Government for development of community programs.

Sustainable Rural Development

We work with the *campesino* population in the rural areas of Barrancas, Rio Brito, and along the Cumaná-Cumanacoa road to help improve agriculture and rural infrastructure, and to conserve their traditions and lifestyle. We have successfully introduced fruit trees from other tropical areas, diversifying local agriculture and encouraging eco-agricultural practices. We support projects such as the development of carpentry using local timber from fallen and standing dead trees. We have implemented the use of solar energy and gravity-piped water delivery for remote communities off the public services grid.

Chronology of Selected Projects in Sustainable Rural Development:

- 1996-present:** Support for **Los Dos Pasos Juntos**, our experimental eco-agricultural fruit farm, and community center for the upper Río Brito valley.
- 1996-present:** Initiation of annual **Vaccination** campaigns for burros and other domestic animals against paralytic rabies and encephalitis with the support of the Ministry of Agriculture and Livestock. These campaigns continue yearly.
- 1998:** Initiation of our **Solar Energy Program**, with installation of solar electric systems in 25 houses, and in the church and school of the remote Rio Brito valley; additional financial support from the Embassy of the Federal Republic of Germany was provided in 2001.
- 2003:** Initial use of **Brito-Barrancas Community Center** to store agricultural products in transit to the Cumaná market and for building materials for Brito valley projects, and as a care station for the community's pack animals.
- 2005:** Installation of **Gravity-Fed Potable Water** for 20 valley families.
- 2006:** Installation of gravity fed potable water for 95 additional families, using our successful previous system as a model, now with government funding.
- 2006:** **Carpentry Classes** at the Brito-Barrancas Community Center using ecologically-harvested local wood.
- 2007-2008:** **Classes** in food preparation and handicrafts at the Brito-Barrancas Community Center.
