“When we dream alone, it is only a dream.  
When we dream with others, it is the beginning of reality.”

*Dom Camera Helder*

April 2, 2013

## ***Our Mission, Achievements and History***

The Turimiquire Foundation is a US-based 501(c)3 non-profit organization that has served the low-income population of Sucre state in northeastern Venezuela since 1996. Based on our more than 35 years of experience (beginning in 1977), we believe that *small, community-based experiments like our own* offer some of the more effective pathways towards realizing the [Millennium Development Goals](#) adopted by the United Nations in the year 2000.

Our [Recipe for a Thriving Community](#) guides our work in three key areas:

### [Health and Women](#)

The first and crucial step towards truly empowering women is to offer them the means to control their own fertility. Through 2012, we have offered **68,586 Couple Years of Protection (CYPs)**, the metric by which USAID measures family planning achievement, to both the rural and urban populations that we serve. The vast unmet need for family planning and reproductive health services far exceeds our current capacity to provide.

### [Education and Children](#)

Once families have gained control of their fertility, they concentrate on giving their children the best possible future through schooling. We support students in remote rural areas and marginal urban barrios through educational and cultural programs at our rural [Casa Barrancas Community Center](#) and at our urban headquarters, [Casa ServYr](#).

### [Sustainable Livelihood](#)

We focus on environmentally sensitive rural community development through introducing low impact utilities like solar electricity and gravity-piped water systems, and promoting ecological agriculture, generating the means for self-sustaining employment towards an enduring rural future.

## **[Reproductive Health and Family Planning](#)**

The Turimiquire Foundation and *Fundación ServYr* work in collaboration with the Ministry of Health of the State of Sucre, with various State and Municipal Offices for Health, Education and Agriculture, in the private sector, and with PROSALUD InterAmericana and PLAFAM / IPPF-WHR, two principal family planning organizations in the national capital, Caracas.

# Turimiquire Foundation

Through selected public health establishments, we distribute free contraceptives and offer free family planning consultations with medical supervision. In the private sector, we subsidize family planning and reproductive health consultations for low-income patients. We have offered surgical sterilizations since 1997. In 2005, we began using modern laparoscopic technology that allows patients to recover and return to their daily activities more rapidly. We offer workshops on sexual and reproductive health and family planning in schools, public health facilities, and other public venues.

The following table summarizes our activities from May, 1997 through December, 2012:

<b>Total number of women attended</b>	<b>28,922</b>
<b>Total number of family planning visits</b>	<b>108,072</b>
<b>Hormonal Contraceptives distributed</b>	<b>82,855</b> (monthly cycles)
<b>Intrauterine Devices placed</b>	<b>5,791</b> (IUDs)
<b>Tubal Sterilizations</b>	<b>3,586</b>
<b>Annual Distribution of Condoms</b>	<b>9,000+</b> (Approximately)
<b>Sexual and Reproductive Health workshops</b>	<b>2,146</b>
<b>Student and adult participants in our workshops</b>	<b>44,666</b>

## Chronology of Selected Projects in Reproductive Health and Family Planning:

- 1997:** Initiation of family planning services in Cumanacoa and rural Montes County.
- 1999:** Initiation of family planning services in Cumaná and rural Sucre County.
- 2000:** Initiation of a family planning clinic in the Fe y Alegría Urban Public Health Clinic, Cumaná.
- 2002:** Establishment of the *Adolescent Orientation Center* in the Fe y Alegría Urban Public Health Clinic, Cumaná, in collaboration with the Ministry of Health and the State Office of Gender and Women’s Affairs, offering education and information on sexual and reproductive health to adolescents both within and outside of the school system.
- 2003:** Initiation of Educational Workshops on sexual and reproductive health, family planning, sexually transmitted infections and diseases, gender-based perspectives, etc., in schools and public health facilities in several counties.
- 2003:** Initiation of family planning services in the “Dr. Julio Rodríguez” Urban Public Hospital, Cumaná.
- 2005:** Adolescents who have attended our sexual responsibility workshops write and present a play titled *Nothing’s Going to Happen to Me... (But It Did!)* organized by the youth theater group of the nearby Culture Foundation of San Juan de Macarapana.
- 2006:** Initiation of *Pana a Pana* (Buddy to Buddy) project in Cumaná to serve educators and peer facilitators in sexual and reproductive health.
- 2007-2009:** Project financed by the State government in 2007, continuing through 2009, executed by *Fundación ServYr* for the reduction of unintended pregnancies and sexually transmitted infections in adolescent populations of four rural counties.
- 2009:** Increasing reproductive health outreach and family planning at public health facilities along the rural Cumaná-Cumanacoa road.
- 2010-2011:** Strengthening family planning services at the “Dr. Julio Rodríguez” Hospital, Cumaná.

# Turimiquire Foundation

<b>2012:</b>	Increasing reproductive health outreach and family planning at public health facilities along the rural Santa Fe - Nurucual road.
<b>2012:</b>	Reproductive Health Education Project financed by the Sucre Municipal government in 2012 and 2013, executed by <i>Fundación ServYr</i> ; for the reduction of unintended pregnancies and sexually transmitted infections in the adolescent populations of Sucre County.
<b>2012:</b>	Collaborating with the Ministry of Public Health in the Establishment of the <i>Adolescent Orientation Center</i> in the Salvador Allende Urban Public Health Clinic, Cumaná.

## General Health

We collaborate periodically with the State Children's Foundation (*Fundación del Niño Sucre*), the National Ministry of Health (*FUNDASALUD*), the Lion's Club (*Club de Leones*), and the State University (*Universidad del Oriente*) in rural medical campaigns, offering attention in the areas of pediatrics, vaccinations, family planning, tuberculosis, *chagas* disease testing, treatment of respiratory inadequacy, dentistry and other health issues.

## Rural Education

We help fund and maintain the following educational programs in the rural areas of Barrancas-Tigre, Río Brito, and nearby communities along the Cumaná-Cumanacoa road.

- Three outlets of *subsidized school supplies*, beginning in 1995.
- *Brito-Barrancas Community Center*, staffed library and computer facilities.
- A new *Brito Education Center* two walking hours upriver with laptop computers and a small library, to serve the new remote Brito high school.
- *Ongoing Support for school activities* at the remote Río Brito elementary school.
- *High School Scholarship Program* for the Río Brito community that enables 45 rural students to continue their studies at local high schools. Before we instituted this program, most students in this community had to abandon their formal education at or before the sixth grade. Now the majority of students make it through high school.
- *College Scholarship Program* for the Río Brito community. In 2008, our first students graduated from high school and some of these students entered college. Each year a few more enter college, and we now have 15 students studying at the college level with ongoing Foundation support, a significant achievement for this rural community.
- *Internet-Computer Center* in Cumaná where our scholarship and other low-income students come to study and to learn computing skills.

### Chronology of Selected Projects in Rural Education:

<b>2001:</b>	Establishment, with the financial support of the Embassy of the Federal Republic of Germany, of the first <b>Kindergarten</b> and <b>Barrancas Community Library</b> in Tigre-Barrancas for students along the Cumaná-Cumanacoa road.
<b>2003:</b>	Renovation, with the financial support of the Embassy of the Netherlands, of the <i>Madre María</i> Child Care Center for the Agua Santa Community, and of the Barrancas Community Library.
<b>2003:</b>	Initiation of our <b>Scholarship Program</b> for remote rural students who wish to continue their studies in high school, growing to over 40 students participating yearly.
<b>2004:</b>	Installation of an <b>Internet/Computer Center</b> in <i>Casa ServYr</i> , Fundación ServYr's headquarters in Cumaná, with free access for low-income members of the rural and urban <i>barrio</i> communities for their studies and general use.
<b>2004:</b>	State University ( <i>Universidad de Oriente</i> ) makes a major donation of books and materials for the

# Turimiquire Foundation

rural **Barrancas Community Library**.

- 2005:** Construction of the **School Cafeteria** for the remote Río Brito elementary school.
- 2006:** Creation of the **Brito-Barrancas Community Center** integrating a variety of programs for children, adolescents, and adults, including a staffed library, tutoring, and computer lessons; art, dance, and cultural activities; dental attention (with support of Sucre State Children's Foundation); and medical attention (with support of Sucre State Public Health Ministry).
- 2007-2009:** *Fundación ServYr* and the Brito-Barrancas Community Center receive financing from the Sucre State Government for development of community programs.
- 2009-2012:** Our high school **Scholarship Program** which supports 45 rural students annually, now has graduating students who are continuing to college with our support. Each year's high school graduating class sends several more rural students to college. Currently, 15 students are enrolled in college with our support.
- 2012:** Two of our first high school scholarship students have received their degrees in nursing, our first college graduates!

## Sustainable Rural Development

We work with the *campesino* populations in the rural areas of Barrancas, Río Brito, and along the Cumaná-Cumanacoa road to help improve agriculture and rural infrastructure, and to conserve their traditions and lifestyle. We have helped to diversify local agriculture and encourage eco-agricultural practices, including the successful introduction of fruit trees from other tropical areas of the world. We support projects such as the development of carpentry using local timber from fallen and standing dead trees. We have implemented the use of solar energy and gravity-piped water delivery for remote communities off the public services grid.

### Chronology of Selected Projects in Sustainable Rural Development:

- 1996-present:** Support for **Los Dos Pasos Juntos**, our experimental eco-agricultural fruit farm, and community center for the upper Río Brito valley.
- 1996-present:** Initiation of **Vaccination** campaigns for burros and other domestic animals against paralytic rabies and encephalitis with the support of the Ministry of Agriculture and Livestock. These campaigns continue periodically.
- 1998:** Initiation of our **Solar Energy Program**, which installed solar electric systems in 25 houses, and the church and school of the remote Río Brito valley; with financial support from the Embassy of the Federal Republic of Germany in 2001.
- 1999:** Our **experimental fruit plantings** of **Jackfruit**, **Rollinia** and various locally unknown tropical fruits begin to bear quality fruit. We begin seedling nurseries with this first generation of Venezuelan cultivars.
- 2001:** Distribution of these **tropical fruit seedlings** to nearby farmers and enthusiasts.
- 2003:** Initial use of **Brito-Barrancas Community Center** to store agricultural products in transit to the Cumaná market and for building materials for Brito valley projects, and as a care station for the community's pack animals.
- 2005:** Installation of **Gravity-piped Potable Water** for 20 valley families.
- 2006:** Installation of gravity-piped potable water for 95 additional families, using our successful system as a model, now with government funding.
- 2006:** **Carpentry Classes** at the Brito-Barrancas Community Center using ecologically-harvested local wood.
- 2007:** Our **Durian** trees begin to produce quality fruit, and we start Durian tree nurseries with first generation Venezuelan seed for future distribution of this renowned fruit, relatively unknown in Venezuela and in most of South America.
- 2007-2008:** **Classes** in food preparation and handicrafts at the Brito-Barrancas Community Center.
- 2008-2012:** Distribution of **Durian**, **Jackfruit** and **Rollinia** seedlings to local farmers, along with our other little known tropical fruit cultivars.
