

From Community Grassroots to Scale

High-impact reproductive health services focusing on family planning

November 2025

We started with a dream of living in Venezuela's beautiful rainforest.

We are now the largest NGO of its kind in the northeastern state of Sucre.

Delivered to date:

100,000+ women & families directly served with family planning

17,915+ tubal ligation and vasectomy surgeries

5,800+ reproductive health education workshops delivered to **153,950+** participants

32,500+ additional medical assists (primary & secondary healthcare)

1,700+ additional surgeries (hernias, etc.)

Annual high school and college scholarships empowering young women

Diverse eco-agricultural initiatives including The Durian Project

Impacts 1997-2025*

182,131 unintended pregnancies averted

64,274 unsafe abortions averted

311 child deaths averted

187 maternal deaths averted

38,402 total Disability-Adjusted Life Years averted

\$11.14M saved in direct healthcare
costs (2025 USD estimated)

* Based on MSA Impact 2 Calculator.

Reflects lifetime impacts of services starting in 1997.

What we do

- Family Planning
- Reproductive Health
- Primary and secondary medical assistance
- Humanitarian aid
- Education services and sponsorships
- Sustainable livelihood initiatives

How we do it

- Highly responsive, efficient service delivery model
- Minimal overhead:
We don't build infrastructure, we leverage what is already there
- Partnerships with public & private healthcare facilities:
A shared win-win
- Focus on quality always

Who we help

- Urban & rural populations:
Low-income, underserved
- Regions previously ignored:
Enormous unmet need
- Clients with a commitment:
Social marketing – every client contributes what they can
- A country without adequate social services:
Decades of socio-economic neglect

Why it works

- 94 cents of every dollar goes directly into the field:
All Board & US Officers are volunteer
- Services widely accepted:
Based on Venezuelan public policy
- Deeply embedded across our cherished communities:
Our local teams work from the inside-out

Our cherished clients

Meet our patients:

- "My birthday was on the day of surgery, it was the best gift I could have." >>> *patient at right* >>>
- "A million thanks for what you did for me. I loved the treatment you gave me, to solve this big issue (*fertility*) in my life. It was excellent service, from the orderly staff, as well as the nursing staff, not to mention the doctors, and of course you and your doctor daughter."
- "Thousands of blessings and may the Lord continue to bless you so that you may continue with this great work."

Our valued partners

Virgen del Valle Clinic

- “Our collaborative work directly confronts the profound social, economic, and humanitarian crisis gripping Venezuela, a reality reflected in the stories of every person we serve.”
- “We encounter daily reminders of this struggle: women with five or six children lamenting the lack of support for family planning, the widespread challenges of illiteracy, and the quiet desperation of individuals who have endured years of pain, simply waiting for an opportunity to find relief.”
- “The Turimiquire/ServYr team is full of positive energy, their surgical days leave a great satisfaction in the clinic, the women express true gratitude with this opportunity to control their fertility.”

Director and staff, Clinic Virgen del Valle

Our Recipe for a Thriving Community

- Time-tested 4-step blueprint for delivering life-affirming services to the underserved
- Based on 35+ years of living and working in our cherished communities and regions
- Highly sought-after – (word-of-mouth)
- Based on what low-income families **tell us** that they want and need

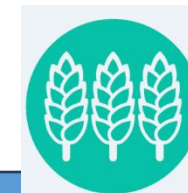

Family Planning

Agility, Cost Efficiency and Quality via PARTNERSHIPS, NETWORKING, AND TEAMWORK

Family Planning

As of September 2025:

- **338,313** Couple Years of Protection (CYPs) delivered to 100,000+ women, men, and their families through a range of contraceptive methods
- **17,915** tubal ligations and vasectomies delivered to clients who qualify: *Our most popular and sought-after service*
- Partnerships with public hospitals, private clinics, and urban and rural out-patient *ambulatorios*: *All services implemented by Venezuelan professionals in accordance with Venezuelan public health policies*

- **5,800+** Reproductive Health Workshops delivered to **153,950+** teenagers, students, and adults
- Focus on adolescents: *Venezuela has some of the highest teenage pregnancy rates in Latin America*
- Mobile teams of social workers, health care providers, and educators: *We go where our clients are*
- Reliable, quality first: *Our reputation for quality is built by word-of-mouth (marketing is not required)*

Medical Assists / Humanitarian Aid

As of September 2025:

- **1,700+** additional medical procedures and surgeries: *Hernias, biopsies, etc.*
- **25,350+** consultations in primary and secondary healthcare: *Gynecology, orthopedics, urology, cardiology, oncology, pediatrics, etc.*
- **7,150+** assists with lab work, imaging, medicine, eyecare, nutrition, and more: *Helping the underserved with basic healthcare services.*
- Partnership with **Fundación Esperanza Rosa** to combat breast cancer

Education

- Direct support of rural literacy, elementary, and high school education programs: *Many students are the first in their families to graduate from high school!*
- Sponsorships for select college students based on merit: *From illiteracy to college degree in one generation*
- Rural Education Center: *In remote community, several hours walking from the road*
- Internet access in both urban and rural

Sustainable Livelihood

- Eco-agriculture emphasizing tree farming as a commercially-viable option for low-income farmers:

Alternative to the deforestation and erosion produced by slash-and-burn swidden agriculture

- The Durian Project fostering Durian and other fruit (Mangosteen, Jackfruit, etc.) as lucrative cash crops:

We may have the only producing durian and mangosteen trees in Venezuela – a huge opportunity for campesinos to join the lucrative durian economy

- Rural Infrastructure:

Public trail improvements, community projects, solar panels and gravity-piped clean water installed for communities in remote rural river valleys

Help us expand into new areas of unmet need

We have the partnerships, people, and resources in place to scale our services **right now.**

All we need is the budget.

Please join us!

Regional expansion opportunities include:

- **Monagas state**
- **Island of Margarita**
- **Barcelona/Puerto La Cruz**
